
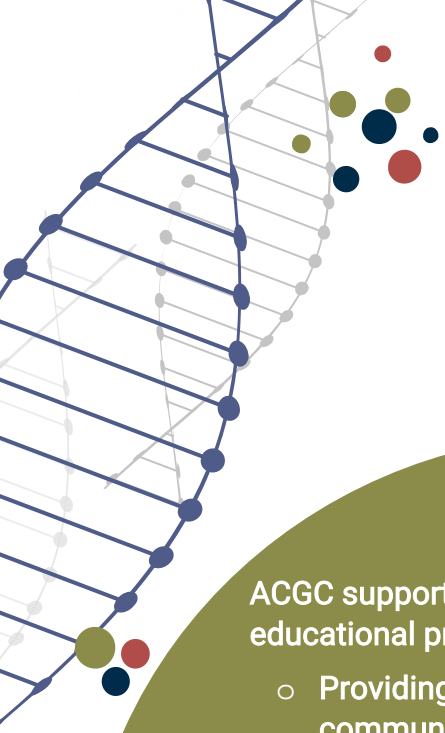
ACGC Annual Accreditation Report

JANUARY 1, 2024 - DECEMBER 31, 2024



MISSION

The Accreditation Council for Genetic Counseling (ACGC) advances quality in genetic counseling education by developing Standards, and by evaluating and accrediting graduate-level programs.

VISION

ACGC supports the development of quality educational programs in genetic counseling by:

- Providing visionary leadership and excellent communication
- Working collaboratively
- Engaging stakeholders in a standard-setting process that proactively considers the impact of new Standards and policies
- Applying the Standards fairly and consistently
- Collecting and disseminating data that supports best practices and quality assessment
- Permitting flexibility and innovation in programs and curricula
- Assessing quality based on educational outcomes

The ACGC Annual Report is intended to provide transparency to the genetic counseling community on the actions and accomplishments of the organization in pursuit of fulfilling the stated Mission over the past year. We also strive to honor the efforts of our incredible volunteers, who give their time to support their community and help to shape the future of the field.

ACGC PRESIDENT'S REPORT

I am honored to be the President of the ACGC for 2024-2025. During this term, I really wanted to concentrate on creating standardized policies and procedures with helpful tools to support the genetic counseling training programs through the many aspects of obtaining or maintaining their accreditation. With the massive support of the Executive Office, the Board, and our many volunteers, we were able to accomplish this task. An overview of the forms, resources, and policy updates that were completed through these efforts can be found later in this report, along with a reference timeline of implementation.

The ACGC also faced new challenges aimed at banning diversity initiatives just as our DEIJ Standards became effective in August 2024. The Board has made decisions to help programs navigate their challenges to support DEIJ and will monitor and update our actions accordingly. ACGC continues to support the DEIJ Standards.

As of the end of 2024, there are 63 accredited genetic counseling programs, four programs were granted Accredited, New Program status, Candidacy status was approved for two programs, and ten programs were reaccredited within the 2024 review cycle. I am pleased to see that the training programs continue to grow and evolve to meet the needs of students. As the programs graduate more genetic counselors, ACGC is very involved in the discussions around the board scores and availability of jobs. We will continue our role in these discussions and partnering with our sister organizations to continuously support the genetic counseling training programs, students, and genetic counselors.

I am grateful to the many volunteers on our Board, committees, and Site Visit teams. ACGC leadership could not do our job as well without everyone's time commitment and dedication to doing the work. ACGC would not be able to complete its mission to support quality genetic counseling education without our "village". I look forward to 2025 and the work that is to come.

Sylvia Mann, MS, CGC
Board President
